Full Stack Developer

Marietta, GA | 404-429-9328 | dizdaroglu105@gmail.com | [Website](#) | [LinkedIn](#) | [GitHub](#)

SUMMARY

Full Stack Developer with 6 years of experience building web applications using .NET, C#, and JavaScript. I help companies deliver scalable solutions through MVC architecture, RESTful APIs, and cloud deployment on Azure. Proven track record developing both front-end features with React and back-end systems with SQL Server across healthcare and education industries.

EXPERIENCE

Connexure – Software Developer – Marietta, GA

Apr 2024 – May 2026

- Developed and maintained enterprise Medical Stop Loss underwriting applications using C#, ASP.NET MVC, SQL Server, JavaScript, and Azure App Services.
- Developed and maintained enterprise Medical Stop Loss applications supporting underwriting, policy administration, claims, premium accounting, medical underwriting, and reporting workflows.
- Worked across full-stack application layers including UI, business logic, APIs, and SQL stored procedures for underwriting and policy management workflows.
- Optimized SQL queries, stored procedures, and data processing workflows to improve application performance and reporting efficiency.
- Implemented enhancements and bug fixes for complex underwriting intake, policy terms, renewal, and reporting modules in a large-scale enterprise environment.
- Improved PPO network import performance by implementing bulk insert processing with SqlBulkCopy for large Excel data imports.
- Collaborated with QA, business analysts, and product teams to troubleshoot production issues and deliver business-critical enhancements.
- Leveraged AI-assisted development tools including Claude to accelerate debugging, SQL optimization, documentation, and feature development workflows.
- Supported Azure-hosted applications, deployment workflows, and enterprise production support activities.

Young Consulting – Software Developer – Marietta, GA

May 2021 – Apr 2024

- Developed and maintained web applications using C#, .NET, ASP.NET MVC, JavaScript, and jQuery
- Conducted code reviews and ensured adherence to coding standards
- Troubleshoot and resolved software defects and issues.
- Developed Controllers, Models, Views, and APIs using MVC architecture
- Worked with SQL Server, creating stored procedures and views, developing stored procedures and views.

MyLearnMate – Web Developer – Remote

Jun 2020 – May 2021

- Developed front-end features using JavaScript, jQuery, HTML, and CSS
- Built an online math-learning application using ReactJS and modern web technologies
- Designed and implemented responsive and user-friendly UI screens
