

SUKRU OGUZ ("OZ") DIZDAROGLU

Full Stack Developer

Marietta, GA • 404-429-9328 • dizdaroglu105@gmail.com • Website • LinkedIn • GitHub

SUMMARY

Full Stack Developer with 6 years of professional experience building enterprise insurance, healthcare, and business applications using C#, .NET, ASP.NET MVC, SQL Server, JavaScript, React, and Azure. Experienced across full-stack development, including user interfaces, RESTful APIs, business logic, Azure-hosted applications, and complex SQL stored procedures supporting underwriting, claims, policy administration, reporting, and data processing workflows. Proven track record delivering scalable business-critical solutions in Agile environments while collaborating with cross-functional teams, including QA, analysts, and product stakeholders. Strong background in troubleshooting production issues, optimizing application performance, and implementing enterprise enhancements using modern development tools and AI-assisted workflows.

EXPERIENCE

Connexure — Software Developer

Apr 2024 – May 2026 | Marietta, GA

- Developed and maintained enterprise Medical Stop Loss insurance applications using C#, ASP.NET MVC, SQL Server, JavaScript, and Azure App Services.
- Built and enhanced underwriting, claims, policy administration, premium accounting, reporting, and medical underwriting workflows in a large-scale enterprise environment.
- Worked across full-stack application layers, including Razor Views, Controllers, APIs, business logic, and complex SQL stored procedures.
- Developed and optimized SQL queries, stored procedures, views, and reporting processes to improve application performance and data processing efficiency.
- Implemented enhancements and resolved production issues for underwriting intake, policy terms, renewals, document generation, and reporting modules.
- Optimized enterprise PPO Network import process by replacing row-by-row SQL inserts with bulk insert (**SqlBulkCopy**) and set-based processing, reducing large file import execution time from timeout-prone behavior to under 5 seconds.
- Collaborated with QA teams, business analysts, and product stakeholders to troubleshoot issues, validate requirements, and deliver business-critical enhancements.
- Supported Azure-hosted applications, deployment workflows, debugging, and enterprise production support activities.
- Leveraged AI-assisted development tools, including **Claude Code**, to accelerate debugging, SQL optimization, documentation, and feature development workflows.

Young Consulting — Software Developer

May 2021 – Apr 2024 | Marietta, GA

- Developed and maintained enterprise Medical Stop Loss insurance applications using C#, .NET, ASP.NET MVC, JavaScript, jQuery, and SQL Server.
- Worked on both legacy enterprise systems and newer ASP.NET MVC applications supporting underwriting, policy management, reporting, and business workflows.
- Developed front-end UI screens, Controllers, business logic, SQL stored procedures, and database views for enterprise underwriting systems.
- Created and optimized SQL queries, stored procedures, and reporting processes to support underwriting and data processing workflows.
- Troubleshot and resolved software defects, production issues, and performance bottlenecks across front-end and back-end systems.

- Collaborated with QA teams, developers, analysts, and business stakeholders to deliver enhancements and maintain application stability.
- Participated in code reviews and followed enterprise coding standards and Agile development practices.
- Contributed to full-stack development efforts across UI functionality and SQL Server data processing workflows.

MyLearnMate — Web Developer

Jun 2020 – May 2021 | Remote

- Developed front-end features using JavaScript, jQuery, HTML, and CSS.
- Built an online math-learning application using ReactJS and modern web technologies.
- Designed and implemented responsive and user-friendly UI screens.
- Implemented authentication and role-based authorization for secure user access.
- Developed RESTful APIs to support front-end functionality and data integration.

SKILLS

Languages:	C#, JavaScript, SQL
Frameworks:	.NET, ASP.NET MVC, Razor, WebForms, Web API, React, Node.js, Express.js, jQuery, Bootstrap
Frontend:	HTML, CSS, AJAX, REST, JSON
Databases:	SQL Server, MySQL, MongoDB, Entity Framework, Sequelize, Mongoose
Cloud & Tools:	Azure App Services, Git, Visual Studio, Claude Code
Practices:	OOP, LINQ, Agile Methodologies, Code Reviews, Continuous Integration

EDUCATION

Georgia Institute of Technology

Atlanta, GA

Full Stack Web Development Certificate

Georgian Technical University

Tbilisi, Republic of Georgia

Bachelor of Science in Electrical Engineering
